## X500 Inhibited Antifreeze

Protect systems against freezing, scale and corrosion.

Provides protection against scale and corrosion in all types of indirect heating systems, including those containing aluminium components, whilst preventing freezing. It is effective at preventing hydrogen gas production.

The dosage of Sentinel X500 Inhibited Antifreeze will depend on the level of frost protection required. A dosage of 20% will give protection down to minus 6°C, 30% will protect to minus 11°C, 35% will protect to minus 15°C.

- Prevents freezing
- Enhanced scale & corrosion protection
- Protects all system metals
- Ensures optimum boiler efficiency
